🗨 INTRODUCTION

I graduated in December 2025 with a BSc degree in Computer Engineering from the Budapest University of Technology and Economics (BME VIK). I am currently pursuing an MSc degree in Computer Engineering at BME, specializing in Automation and Applied Informatics.

My interest in IT began in high school, where I developed a passion for both programming and computer networking. After completing a networking qualification, I continued my studies at university, focusing primarily on software engineering while also earning the Cisco DevNet Associate (DEVASC) certification.

Throughout my studies, I maintained strong academic performance while gaining valuable industry experience through internships, professional positions, and numerous personal and team projects. While my main focus is frontend development, particularly React and modern web technologies, I have also worked extensively with backend systems, databases, APIs, and DevOps tools. I enjoy learning new technologies and building scalable, high-quality software solutions.

PROFESSIONAL EXPERIENCE

Confidential Company

Frontend & Full Stack Developer

2024 – Present | Budapest, Hungary

Contributed to the development and maintenance of large-scale SaaS applications used by enterprise clients. Worked extensively with React, Next.js, Payload CMS, Sanity CMS, and .NET technologies to build modern, scalable web solutions.

Participated in the design and implementation of frontend features, backend integrations, content management systems, and CI/CD pipelines. Collaborated on SEO optimization, performance improvements, and the deployment of production-ready applications.

Gained hands-on experience in the full software development lifecycle, from planning and development to testing, deployment, and ongoing maintenance of business-critical systems.

RolandIT

intern

2024 – 2024 | Budapest, Hungary

I joined a team who developed various websites based on client requests as part of a team. Technology used: React framework

Webforyoukft

intern

2021 – 2022 | Budapest, Hungary

I joined a team who developed various websites based on client requests as part of a team. Technology used: Angular framework

Andormentor

Junior Web Developer

2019 – 2020 | Budapest, Hungary

Developed a static website for a stock market mentoring company. Worked directly with the client to implement requirements and create a responsive, user-friendly web presence. This project provided my first professional experience in web development and client collaboration.

EDUCATION

Computer Engineering

BME VIK - MSC

2025 – Present | Budapest

Computer Engineering

BME VIK - BSC

2022 – 2025 | Budapest, Hungary

Cisco DevNet Associate (DEVASC)

Cisco Networking Academy

2025

SKILLS

- React
- TypeScript
- HTML5
- CSS3, SCSS
- MySQL
- Python
- Docker
- RabbitMQ, NATS
- C#, ASP.NET
- Power BI
- Linux Server
- Windows Server
- Virtual Private Network (VPN)
- Network Security
- Cisco Networking
- Packet Tracer
- Swagger
- Next.js
- Material UI (MUI)
- Payload CMS
- Sanity CMS
- PostgreSQL
- CI/CD Pipelines
- GitHub Actions
- GitHub
- GitLab
- Jira
- Plane
- SEO
- Ahrefs
- Google Analytics 4 (GA4)
- Google Tag Manager (GTM)
- Microsoft Clarity
- Google Search Console
- Azure
- OAuth 2.0 / OpenID Connect
- MSAL

Computer system and application operation technician

BMSZC Neumann János Informatikai Technikum

2021 – 2022 | Budapest, Hungary

Computer Science

BMSZC Neumann János Informatikai Technikum

2017 – 2021 | Budapest, Hungary

CERTIFICATES

- Europass - Computer system and application operation technician
- Driver License
- International certificate for operators of pleasure craft
- Cisco Certified Network Associate Automation (CCNA)
- BSc Degree in Computer Engineering, Budapest University of Technology and Economics (BME VIK)
